

PROFILE

MSc (M2) student at Université Grenoble Alpes with research experience evaluating NLP approaches and their computational costs. Combines experimental AI work with software engineering and technical troubleshooting, with interests in resource-efficient AI, human-AI interaction, and visualization. Seeking a 20+ week internship starting between February and March 2027.

SKILLS

- AI & data: Python, NumPy, pandas, scikit-learn
- ML & NLP: TF-IDF, Transformers, DistilBERT, TinyLlama
- Software engineering: C++, JavaScript, SQL, Git, Linux, API testing and debugging
- Web & interaction: HTML/CSS, SvelteKit, Vue.js, Tailwind CSS, user-centered interface design

LANGUAGES

- English (C1 - IELTS 7.5)
- Russian (Native)
- Spanish (B1)
- French (A2)

ANDREI BEZRUKOV

MSC ARTIFICIAL INTELLIGENCE | APPLIED ML & NLP | SUSTAINABLE AI, HCI & VISUALIZATION

EDUCATION

Université Grenoble Alpes / Grenoble INP-Ensimag *(Grenoble, France)* — 2025-2027 (EXPECTED)
MSc Computer Science (MOSIG), Year 1
MSc Artificial Intelligence (MAI, Applied AI track), Year 2

ITMO University *(Saint Petersburg, Russia)* — 2019-2024
Bachelor's in Mobile and Online Technologies
GPA: 4.24/5

Abdullah Gül University (*Kayseri, Turkey)* — SEP 2023 - JAN 2024
Computer Science exchange semester
GPA: 5/5

RESEARCH & PROFESSIONAL EXPERIENCE

LIG — Grenoble Informatics Laboratory — JAN - JUN 2026
(Grenoble, France)
Research Intern

- Built experimental pipelines comparing rule-based, TF-IDF, Sentence Transformers, DistilBERT and TinyLlama for text categorization and recommendation, evaluating accuracy and computational cost.
- Benchmarked runtime, memory and computational requirements; quantified trade-offs between task accuracy and resource efficiency to guide model selection.

Growave *(Remote)* — MAR - OCT 2026
Technical Account Manager

- Investigated complex Shopify platform and integration issues involving CSS, Liquid, Shadow DOM, and SQL.
- Reproduced software defects, documented technical findings, and coordinated with Development and QA teams through Jira.

Smart Service *(Saint Petersburg, Russia)* — APR - SEP 2024
IT Support Specialist

- Investigated and tested software issues across MyQRCards and HubEx using Postman, Swagger and browser developer tools, handling 1,000+ support requests.

PROJECTS

COMPAS Data Science

- Analyzed the COMPAS recidivism dataset to investigate demographic disparities, evaluated classifiers using fairness metrics.

Wisenourish

- Built a nutrition-tracking web application with SvelteKit, Tailwind CSS, and the Spoonacular API.

Mipmap filtering

- Built a graphics pipeline in Python and studied how different texture sampling strategies affect image quality and performance.
